

Baltic

by Krystian Kowalski

The Baltic chair is the representation of versatility and comfort expressed through meticulously outlined shell form that is embedded on thoughtful and elegant bases.

The strive for perfection resulted in constructing a multifunctional family of chairs that please the user with cosiness regardless of the setting. Being abundant with options, the Baltic chair can serve numerous purposes in both commercial and residential use.

Work, dining, relaxation, outdoor – the Baltic grants a freedom of choice. Various types of bases, each manufactured using different technology, serve

diverse purposes while preserving the same concept of a cosy shell chair. In spite of shuffling between different aesthetic approaches of classic four-legged, unconventional four-spoke with or without castors, and traditional wooden base, the Baltic chair never loses its distinctive character. The sensation of comfort is built up by adding a soft cushion upholstered in the finest quality fabrics from renowned European brands.

The Baltic chair is no shy when it comes to minimizing the impact on the environment. Both metal and wooden components are well known recyclable materials that can be reprocessed multiple times.
